

Checklist Addendum H

Phase I Geologic Investigation Checklist

Township of Franklin, Warren County, New Jersey

[Added 6-10-1996 by Ord. No. 96-9]

The purpose of the Phase I Geologic Investigation is to determine if the site is located within the CRA, and if karst features are exhibited. A field site-reconnaissance will be conducted by the TGC with the applicant.

Please complete the following:

1. This site is in the Carbonate Rock Area (CRA) _____, Carbonate Drainage Area (CDA) _____.
2. Proposed water supply
3. Proposed wastewater disposal
4. Does the proposed project include the storage of manufacturing of toxic or hazardous materials? _____
If yes, attach an explanation of the type of activity.

Please attach the following:

Geologic Report prepared in accordance with § 90-72D(2).

US Geologic Survey 7 1/2 min. topographic quadrangle map with parcel identified.

USDA Soil Conservation Service soil survey map with parcel identified and soils present.

Site map at scale of 1" = 1000' identifying proposed development site and boundaries showing areas within the CRA and/or CDA.

Plot plan at a minimum scale of 1" = 200' showing topography, layout, existing surface water bodies, springs, disappearing streams, existing and proposed wells and septics, areas of outcrop, faults, sinkholes, and the locations of all existing wells and septics within 100' of the project property line.

Aerial photograph print containing the proposed site (minimum scale of 1" = 1000')
